

Enterprise Highlighting

Make your website talk!

Attract more visitors by offering an audio version of your website. For businesses and organizations of all sizes.

When your users can **Click & Listen**, your content becomes more accessible and user-friendly.

ReadSpeaker® Enterprise™ Highlighting extends the reach of your online content by instantly creating an audio version of your website.

It speech-enables online content on the fly in 35+ languages and 100+ voices. No downloads are required and all updates are automatic.

Built with usability in mind to provide maximum access to your content, it is used in both the public and private sectors worldwide.

Cloud-Based Multilingual Solution

ReadSpeaker Enterprise Highlighting consists of a Listen button and an integrated fully keyboard-controllable audio player.

In our latest release, we have updated our player to the latest web standards (HTML5/ CSS), requiring fewer images and no Flash, while making the design and functionality more user-friendly.

We also offer several ways for you to easily customize our player to better match the design of your website.

ReadSpeaker Enterprise Highlighting works on all devices and browsers, even the latest iOS and Android devices.

Main Features

- Multiple languages and multiple voices per language
- Customizable reading area, order, and speed
- Customizable highlighting colors
- Pronunciation dictionary
- Support for banner and audio ad insertion
- WCAG 2.0 compliant
- Easy step-by-step implementation instructions
- Online access to statistics, FAQ, best practices, and troubleshooting

Enterprise Highlighting

The Web-Reading Experience

When your user clicks the Listen button, [ReadSpeaker Enterprise Highlighting](#) opens our player and starts reading the content of the page. The text is also highlighted while it is being read, reinforcing a better understanding of the text.

The Listen button.

Clicking the Listen button opens the player.

The text is read and highlighted.

ReadSpeaker® is the worldwide leader in online text to speech. In 1999, ReadSpeaker pioneered the first-ever speech-enabling application for websites.

The settings menu enables your users to customize the reading experience. They can control the **reading speed** and how the **text is highlighted**, either sentence by sentence or word by word.

They can **select text** to only listen to certain parts of the page. They can also choose to have the **page scroll automatically** to follow the highlighted text.

From Text to Speech in Seconds

1. The user visits your website and sees the Listen button.
2. The user selects some text or clicks the Listen button for the full text.
3. [ReadSpeaker](#) collects the text and produces the speech.
4. [ReadSpeaker](#) streams the audio to the user.

Let your users Click & Listen!

More Options for Complete Functionality

- [ReadSpeaker docReader™](#) lets your users listen to PDFs, Word documents, and other online document formats.
- [ReadSpeaker formReader™](#) provides your users with vocal assistance when filling out online forms.
- Plugins for several popular content management systems make implementation even easier.
- We can customize [ReadSpeaker Enterprise Highlighting](#) for your needs and the needs of your users.
